

Cyber Resilience. Financial Protection. Less to Think About.

Large companies recruit security professionals to develop network protection strategies requiring considerable expertise and large budgets. Small and medium-sized businesses can't, for those same reasons. Cyber insurance could be an equalizer, but not unless baseline defenses are in place with coverage and premium costs in alignment. Unfortunately, they never are.

That's why we developed CHECKLIGHT®.

CHECKLIGHT® is a remotely managed, 7/24/365 security service that delivers protection against all the malicious attacks that you've heard about, including zero-days. Importantly, it also provides insurance that fits small business needs and is priced accordingly. Table stakes for small businesses include asset protection and business interruption coverage, just like their larger counterparts.

That's CHECKLIGHT®.

Cyber Insurance Protection-as-a-Service

- \$500K limit per client; sublimit of \$250K per event; no deductible.
- Provided by US carrier rated Excellent by A.M. Best.
- Highly affordable; cost is embedded via warranty in monthly subscription pricing.
- No application forms, no underwriting process; no effort, reporting, or input from client or producer needed.
- Coverage is in plain English; easy claims process; straight to the carrier's central claims center.

**BUSINESS
CONTINUITY**

CHECKLIGHT® Features

SET IT AND FORGET IT!

- Next generation signature, behavior, and machine learning (ML) algorithms continuously monitor your laptops and servers.
- The same threat intelligence used by Federal Agencies.
- Specializes in kill chain methodology for added protection against zero-day viruses.
- Recognizes known/unknown malware; malware-less attacks (WMI, PowerShell, VBA), real-time and dwell-time attacks.
- Works with with all operating systems and seamlessly operates with all existing software and hardware solution sets.
- All processing done on cloud-native architecture (AWS).
- Provides an asset management dashboard for visibility to all covered laptops and servers, update status, and overall security state.
- Instantaneously alerts users of attacks/threats via email, text, and dashboard notices.
- Generates user-defined periodic summary reports to support compliance and audit requirements.
- Offers consultative access to an on-shore team of security engineers who are available when you need them. First class customer service!

Problem Highlights

- Automated attacks do not discriminate based on business size. 43% of breach victims are small businesses.
- Larger businesses rely on security delivered as-a-service. Small businesses can't afford it.
- If available, available options miss the mark. The problem/solution fit for the small business owner has never made sense.

Why CHECKLIGHT®

- Effective and affordable security-as-a-service combined with right-sized insurance, created exclusively for small businesses.
- 7/24/365 protection for laptops and servers. Rogue processes are identified and quarantined without disruption to normal operations.
- An active service model. You know it's working. Regular status updates.

About Us

Cyber Assurance Group, Inc. (CAGI) is an innovative cybersecurity insurance company based in Greenwich, Connecticut. We were founded to improve cyber coverage for small and medium sized businesses (SMBs). Through partnerships with innovative technology vendors and insurance carriers, we enable the delivery of enterprise class business resilience solutions to SMBs, as-a-service. We combine these services with straightforward insurance coverage, and dynamically price in accordance with the insured's cyber hygiene.
